All the software you need for your education on one platform

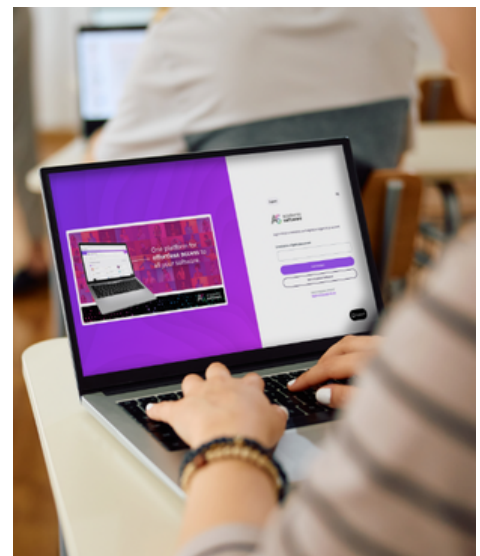

What is Academic Software?

The use of software and licences has become an integral part of the classroom and is playing an increasingly important role in education. Moreover, working with **high-quality digital tools** has become essential in preparing our students for the future. We also aim to provide **inclusive education**, offering every student equal opportunities to grow and develop.

That's why we use the Academic Software platform. This solution ensures continuous **access to legal software, licences, and the necessary support, both at home and on campus.**

How does it work?

① Go to portal.academicsoftware.com/login

② Log in with your **school account**

🏁 It's that simple!

In addition, our teachers and students have access to **a professional multilingual helpdesk**. This helpdesk supports everyone with any software-related issues and is available every working day.

Where can I find my software?

The software you see depends on the package linked to your account. You can find it in the top navigation bar, under the 'Software' menu item.
